

Cymoxanil (+ Mancozeb)

Cymoxanil is a foliar applied fungicide that inhibits sporulation. It has a relatively short persistence and is mostly used in combination with protective fungicides e.g. Mancozeb (see page 48) in order to improve its period of action. Cymoxanil is one of the leading products for the treatment of downy mildew in vines and blight in potatoes.

Action:

- contact and local systemic
- curative

FRAC classification: 27

CAS No.: 57966-95-7

Technical grade: min. 98%

Formulations:

- Cymoxanil --
- Cymoxanil + Mancozeb 72 WP (8% + 64%)

Packaging¹:

- Cymoxanil: 25 kg bags (tech.)
- Cymoxanil + Mancozeb 72 WP: 25, 1, 0.5 kg

Crops	Diseases	Dose rate ² g a.i./200 ltr.*
Grapes	Downy mildew (<i>Plasmopara viticola</i>)	2 – 3
Tobacco	Downy mildew (<i>Peronospora tabacina</i>)	2 – 3
Potato	Early blight (<i>Alternaria solani</i>), Late blight (<i>Phytophthora infestans</i>)	2 – 3
Onion	Downy mildew (<i>Peronospora destructor</i>)	2 – 3
Tomato	Early blight (<i>Alternaria solani</i>), Late blight (<i>Phytophthora infestans</i>)	2 – 3

¹upon request we provide customized packaging
²always follow national label recommendations

*Recommendation for Cymoxanil (8%) and Mancozeb (64%) mixture
